Agricultural Belt Solution

Sarang Domde

Hingna, Nagpur, Maharashtra, India

QUESTION

Agricultural Belt Solution

PIX is an established name in Agricultural Belts. Agricultural Belts work in the most arduous environment and have to withstand adverse conditions while operating.

They are subjected to the most strenuous operations, the dust, soil, stone granules, stray remains of the harvested crop, etc are likely to create interference during the operation. The drive is often subject to extreme weather

PIX Muscle® -XR4
High power, Maintenance-free, Moulded Raw Edge Cogged Belts

PIX has taken several strides in product development to expand our mutual growth opportunities, segment share, as well as business interests. It now gives us great pleasure to announce the launch of the Muscle XR4® High Power, Maintenance Free range of Moulded Raw Edge Cogged V-Belts!

The culmination of several months of high-end research, development and intense testing, the Muscle XR4® provides the end-user with a host of outstanding benefits including...

- Superior service life ensuring a higher return on investment.
- Extended temperature range from -50°C to +120°C for optimal performance in diverse applications.
- Maintenance-free performance resulting in minimal service costs.
- Exceptionally high power rating over standard belts.
- Special belt surface design for superior flexibility and abrasion resistance.
- High transmission efficiency up to 98%, resulting in enhanced productivity and reduced cost of ownership.
- Special cog design for enhanced flexibility and rapid heat dissipation.
- Complies with ISO 1813 for anti-static properties for enhanced operational safety.
- Space-saving potential to allow for compactness in the drive.
