Industry News

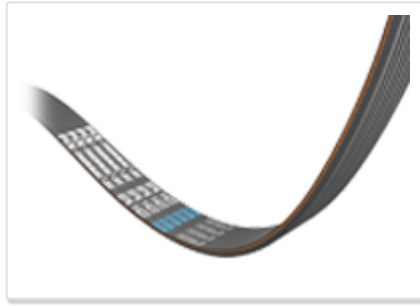

40 years of Godiva Bearings

Life

Temperature range: -35°C to +130°C

Oil-free, Moulded Raw

High power rating up to 50% more than standard Belts
Oil-free facilitates enhanced
faster heat dissipation
High efficiency up to 98%, providing optimum output
The property of the Belt ensures less machine downtime and
longer life

ISO 1813 for anti-static property

Potential

Oil compliant provides an eco-friendly system

Compatible with a minimum tension-drop

Temperature range: -35°C to +130°C

Oil Raw Edge Cogged Belts)

Next-generation, high speed engines

Enhanced flexibility and
dissipation rate

High transmission capacity, best
for diameter pulleys

Chemically treated, low-
friction for conveying higher
viscosity

Better grip and lateral

Resistance to oil and heat
